

## ADJUSTABLE CABLE GUARD

Your Predator Archery Raptor Compound Bow is incredibly versatile and can be adjusted to accommodate many different size archers. Use your owner's manual to set your draw weight and length, then adjust your cable guard if necessary.

This is the cable guard that you'll find on the riser of your Predator Archery Raptor Bow.

Remove the Predator Archery emblem to loosen the two Allen style set screws.

Rotate the cable guard and set it so the bend is pointed downwards in the 5 o'clock position.

Tighten the two set screws and reinstall the emblem (you can use BLUE Loc-Tite as well).
